

PHP Project Work Manual

Project Name: Web-Application of a School Management System.

Top-Up IT Training, IUB

Hello Guys,

Here I've created a work-map on our project for PHP training at IUB.

I did a little CSS on this form page. Use this .css file as a sample and make your desired user-interface by adding there.

- Please insert your code in `<div class="container"></div>`.
- Use any suitable variable to complete the design of your page, after combining all we'll change the variable if needed.
- Use the 'Layout' of our submitted '**System Diagram**' as a reference of your UI. You may find hints/layouts of some of the pages.
- Try to identify your variables by mentioning 'user type'. E.g.- stuid, teacherid etc.
- The navigation bar or, menu bar will be added later after completing the whole UI.
- The remaining work after UI design (PHP & MySQL connection) will be done by group discussion.

User Type	Page Name	UI will be designed by
Universal Pages	Log in	Chayan Das
	Dashboard	Prosenjit Chowdhury
Same for both Teachers & Students	Payment View	Faisal Siddiquee
	Own Profile Update	Mohammad Riduan
	Contact (with file upload option)	Faisal Siddiquee
Students	Online Admission Form (with captcha)	Chayan Das
	Notice Board View	Mohammad Riduan
	Assignment Submission (file upload)	Prosenjit Chowdhury
	Result View	Faisal Siddiquee
	Course Materials Download	Faisal Siddiquee
	Application Form for Hostel Facility	Chayan Das
Teachers	Result Update	Faisal Siddiquee
	Attendance View	Mohammad Riduan
	Course Material Upload with instructions	Chayan Das
	Assignment Download	Prosenjit Chowdhury
Administrator	Payment Info Update	Prosenjit Chowdhury
	Notice Board Update	Prosenjit Chowdhury
	Result Edit	Mohammad Riduan

For any queries please call or message me...
